Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Cecil W. Davison and Mary L. Fant. Lilia George provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Current Information and Popular Publications Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, Agriculture and Trade Analysis Systems Branch, Data Services Center.

Digest

Exports Dip Slightly in FY 1994 (see p. 2)--U.S. agricultural exports totaled \$19.1 billion during the first 5 months of FY 1994 (October 1993-February 1994), 1 percent below the same period of FY 1993. High-value product (HVP) exports totaled \$10.9 billion, a gain of over 4 percent. Solid increases in U.S. exports of chicken, fruit, nuts, vegetables, and vegetable oils boosted HVP exports. The value of bulk commodities declined 8 percent to \$8.2 billion as wheat, corn, and soybean exports declined.

U.S. Agricultural Imports Continue Upward Trend (see p. 6)--Agricultural imports for October-February 1993/94 were \$10.8 billion, 6 percent ahead of the same period last fiscal year. Competitive imports were strong during the period, rising 8 percent to \$8.4 billion. Grains and feeds, tobacco, and fresh and frozen vegetables showed large gains.

California Again Top Exporter in FY 1993 (see p. 7)--The United States exported \$42.6 billion worth of agricultural commodities in FY 1993, slightly more than the previous year. For the ninth consecutive year, California was the top exporter of agricultural commodities. Iowa ranked second again, followed by Illinois, Nebraska, Texas, Kansas, Minnesota, North Dakota, Indiana, and Washington. About half of the States' estimated export shares increased compared with FY 1992, and 14 States exported more than \$1 billion in agricultural products.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD). To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal opportunity employer.

Exports Dip Slightly in FY 1994

U.S. agricultural exports totaled \$19.1 billion during the first 5 months of FY 1994 (October 1993-February 1994), 1 percent below the same period of FY 1993. High-value product (HVP) exports totaled \$10.9 billion, a gain of over 4 percent. Solid increases in U.S. exports of chicken, fruit, nuts, vegetables, and vegetable oils boosted HVP exports. The value of bulk commodities declined 8 percent to \$8.2 billion as wheat, corn, and soybean exports declined.

Chicken export value has increased every year since FY 1986, and was a record \$733 million in FY 1993. The trend continued through October-February FY 1994 as exports of fresh or frozen chicken reached \$397 million, 34 percent higher than the same period of FY 1993. The largest gain was to the former Soviet Union (FSU), with exports of \$93 million, compared with \$4 million a year earlier. Exports to the FSU totaled 117,000 tons, nearly a quarter of U.S. chicken exports. In FY 1993, 6,000 tons were shipped during October-February. Shipments to Hong Kong rose substantially to \$75 million, an increase of \$15 million over October-February of FY 1993.

Beef export volume rose almost 10,000 tons to 181,000 tons, but value was unchanged as reduced export prices offset the volume gain. Shipments to Japan rose to about 99,000 tons, a 15,000-ton increase, but decreased shipments to Mexico slowed the rise in beef. Pork shipments rose 25 percent, but lower pork prices reduced the value gain to 10 percent (about \$213 million). Shipments to the FSU accounted for much of the increase as exports rose to 16,500 tons, compared with 96 tons during the same period last fiscal year.

The value of horticultural exports rose to \$3.1 billion for October-February, 10 percent higher than during the same period for FY 1993. Vegetable and nut export values were the highest ever for the first 5 months of a fiscal year, and fruit exports were slightly lower than in FY 1992 when fruit exports reached a record.

Fruit shipments, including juices, totaled \$1.1 billion, an 8-percent rise. Fruit exports, in volume and value, were led by gains in apples, grapes, and pears with growth to most markets except Europe. Fruit exports to Mexico showed strong growth, particularly for apples. Fresh citrus shipments

declined, but higher prices expanded the value of exports.

Vegetable exports were almost \$1.4 billion, an increase of 7 percent. Fresh vegetables lagged year-ago levels but gains in frozen, canned, and other prepared vegetables boosted total vegetable exports. Most of the gain was in Asian markets, particularly Japan, Hong Kong, and Taiwan. There were also gains to Mexico and some Caribbean countries.

Nut exports totaled over \$660 million, 16 percent higher than in 1993. Nut export value expanded because of much higher prices for almonds due to reduced California production in 1993. At \$4,470 per ton, almond export prices were 42 percent higher than for the comparable period last fiscal year. In volume terms, almond sales were down to the European Union (EU), the largest market for U.S. almond exports, but rose to Japan despite the higher prices.

U.S. vegetable oil exports totaled nearly \$520 million for October-February. Volume rose only 7 percent as sharply higher prices pushed values upward. Shipments to Africa, a primary destination for soybean oil, were down in volume although the higher prices raised value \$12 million to \$83 million. Pakistan received over 71,000 tons of soybean oil under P.L. 480 during October-February, as the United States restored P.L. 480 funding to Pakistan for vegetable oil purchases. Cottonseed oil shipments gained to Japan and Korea, and corn oil shipments rose to Middle Eastern countries.

Shipments of wheat, corn, and soybeans were 17 percent below October-February FY 1993. Shipments for the first 5 months of FY 1994 were the smallest for wheat and soybeans since 1991, and since 1987 for corn. Year-to-date wheat shipments totaled 14.5 million tons, 1.3 million tons less than last year; corn was down 4.3 million tons at 15.9 million tons; and soybeans were down 2.5 million tons to 9.8 million tons.

The largest drop in wheat exports was to the FSU, which received only 990,000 tons, compared with 1.8 million tons for the same period in FY 1993. The United States also exported over 1 million tons less to India and Pakistan, and 200,000 tons less to Africa. Shipments were up to Algeria and Tunisia but dropped sharply to Egypt and South Africa.

Fiscal 1994 corn exports were adversely affected by lower U.S. production and higher prices, as well as increased exports from China and South Africa. U.S. exports to Korea were only 53,000 tons, compared with nearly 800,000 tons over the same 5 months last year, as Korea purchased more Chinese corn. Shipments to southern African countries halted, as the corn harvest recovered from drought in 1991/92.

Soybean shipments decreased to almost every market except Mexico and Germany. Shipments

totaled over 450,000 tons to Mexico, up 92 percent over the year earlier, and 735,000 tons to Germany, a 4-percent gain. Overall, shipments to the EU declined over 25 percent to 5.1 million tons. EU demand for U.S. soybeans remained low because of increased grain feeding, a crush margin favoring soybean meal imports over soybeans, and increased competition of exports from South America. *(Joel Greene, Commodity and Trade Analysis Branch, 202-219-0822)*

Table 1--Agricultural, nonagricultural, and total trade balance of exports and imports

Item	October-February		February

U.S. Agricultural Imports Continue Upward Trend

Agricultural imports for October-February 1993/94 were \$10.8 billion, 6 percent ahead of the same period last fiscal year. Competitive imports were strong during the period, rising 8 percent to \$8.4 billion. Grains and feeds, tobacco, and fresh and frozen vegetables showed large gains.

Non-competitive product imports rose slightly to \$2.4 billion, \$40 million above October-February 1992/93. Among non-competitive commodities, cocoa, spices, and tea quantities increased. Non-competitive commodities made up 22 percent of import value, down from 24 percent in the first 5 months of FY 1993.

Small Grains

October-February wheat shipments from Canada surged 80 percent in value, or nearly \$60 million for the first 5 months of FY 1994, compared with the same period a year ago. Canadian shipments totaled 1,106,000 tons at \$129 million. October-February imports from Canada have risen steadily for the past 10 years. However, the pace quickened this past year, as October-February 1993/94 shipments are already equal to 75 percent of total FY 1993 volume. Strong export demand for the U.S. crop, high Canadian production, and reduced imports by the former Soviet Union (FSU) have made the United States an attractive market for Canadian grains. Canadian oat volume was up 60 percent to 550,000 tons for the same period. October-February Canadian barley imports, after a slow FY 1993, were up 650,000 tons.

Coffee

Coffee import volume was down 22 percent for the first 5 months of the fiscal year, compared with the same period a year ago. At 84,000 tons, shipments for the October-February period are the lowest since 1989. Coffee unit values for the first 5 months of FY 1994 are 30 percent higher than for the same period in 1993 and February 1994. Unit values were the highest since FY 1991. Stagnant per capita consumption and low world supplies have squeezed imports and helped boost coffee prices. Coffee imports from Latin America made up 10 percent of total Latin American shipments to the United States in FY 1993, down from 19 percent the previous year. Total coffee imports of 420,000 metric tons were primarily from Latin America, with smaller amounts from

Asia and Europe. Latin American shipments totaled 365,000 metric tons in FY 1993 with Brazil as the major source, shipping 107,000 tons.

Cocoa Imports

Cocoa volume is down 5 percent from October-February 1992/93. A decrease in unit values of 6 percent left values down for the period. For FY 1994, unit values are likely to increase considerably over FY 1993, if trends begun in the later part of 1993 continue. Cocoa prices are rising because world stocks are expected to decline for the third consecutive year. Africa is the major source of cocoa, about 34 percent of imports came from the Ivory Coast, Ghana, and Nigeria in FY 1993. Latin America shipped 25 percent and Asia shipped 15 percent of total U.S. imports. The Ivory Coast, Indonesia, and Brazil are the major exporters of cocoa to the United States.

Bananas

Banana shipments were down 6 percent from October-February 1993/94, totaling 1.5 million tons. Unit value declines of 4 percent during the period resulted in a 6-percent decline in value to \$403 million. Lower prices for the first 5 months of the fiscal year have not caused imports to rise substantially. Bananas account for 11 percent of the value of Latin American exports to the United States, for the first time edging ahead of coffee. Costa Rica, Ecuador, Columbia, and Honduras are the major sources of U.S. banana imports. *(Tom Capehart, Commodity and Trade Analysis Branch, 202-219-0822)*

California Again Top Exporter in FY 1993

The United States exported \$42.6 billion worth of agricultural commodities in FY 1993, slightly more than the previous year. For the ninth consecutive year, California was the top exporter of agricultural commodities. Iowa ranked second again, followed by Illinois, Nebraska, Texas, Kansas, Minnesota, North Dakota, Indiana, and Washington. About half of the States' estimated export shares increased compared with FY 1992, and 14 States exported more than \$1 billion in agricultural products.

Top Ten Export States Unchanged

The top 10 exporting States remained the same as in FY 1992, with some reordering of rank. The top 10 States accounted for 57 percent of total U.S. agricultural exports, and all of them exported over \$1 billion worth of commodities. In addition to these top 10 States, Arkansas, Missouri, Ohio, and North Carolina also shipped over \$1 billion. Because FY 1993 exports increased only slightly, there were no huge gains similar to FY 1992, when exports rose 13 percent and States had large estimated export gains. However, in 1993, North Dakota and Indiana exports rose over 16 percent, and Illinois exports gained 10 percent. The other top States either had small increases or declines.

California exported an estimated \$5.2 billion in agricultural commodities, an increase of 2 percent. California was the leading exporter for fruits, vegetables, tree nuts, and seeds. Fruit, vegetable, and tree nut exports of \$3.6 billion accounted for 70 percent of California's agricultural shipments, and 53 percent of total U.S. shipments. California ranked second in cotton, cottonseed, and dairy exports.

Iowa ranked second again at almost \$3 billion, slightly ahead of Illinois. Iowa continued to lead the United States in exports of feed grains and products (\$1.2 billion). A \$64-million drop in soybean exports offset other gains and left Iowa's total exports unchanged in FY 1993. Illinois was the leading soybean exporter at \$1.1 billion, as its soybean exports rose 10 percent and Iowa's fell. Illinois' total exports rose 10 percent to nearly \$3 billion because of increased exports of feed grains, soybeans, and feeds and fodders.

Nebraska was the leading exporter of animal products for the second consecutive year, ranking

ahead of Kansas. Nebraska ranked first in exports of live animals and meat products at \$633 million, hides and skins at \$236 million, fats, oils, and greases at \$96 million, and feeds and fodders at \$172 million. Nebraska's total exports dropped 5 percent to \$2.4 billion because of declines in feed grains and wheat.

Texas dropped to the fifth position behind Nebraska, as Texas exported nearly \$278 million less cotton and \$10 million less cottonseed in FY 1993, dropping total exports 8 percent to \$2.4 billion. Texas was the leading cotton exporter, but a sharp decline in U.S. cotton shipments lowered exports from all cotton producing States. Texas was second ranked in exports of feeds and fodders, tree nuts, and peanuts and products.

Kansas and Minnesota filled the sixth and seventh positions, and North Dakota moved up to eighth. Kansas' major exports were wheat and products (\$639 million), and animal and meat products (\$542 million), but exports from Kansas fell 6 percent to \$2.2 billion because of declines in wheat and feed grain shipments. Minnesota's wheat exports increased 56 percent to \$344 million, making the State the third leading exporter of wheat in 1993, compared with the eighth position in 1992. Minnesota's exports of vegetables, fats and oils, and dairy products gained in 1993, but reductions in feed grains and soybeans pushed Minnesota's exports down 4 percent to almost \$2 billion. North Dakota was the leading wheat export State, with sales topping \$1 billion, 33 percent more than in FY 1992, as North Dakota production increased and the United States exported more spring wheat in FY 1993. The stronger wheat exports pushed North Dakota's estimated exports up to \$1.4 billion. North Dakota remained the leading exporter of sunflowerseed and oil at \$97 million, although exports declined 7 percent.

Indiana exports gained over 16 percent to \$1.4 billion, as feed grain shipments increased \$129 million after dropping sharply in FY 1992. Indiana also exported more wheat and soybeans. Washington exports rose by 4 percent to \$1.3 billion, but dropped to the tenth position because of the stronger gains by Indiana and North Dakota. Washington's leading export was fruit (\$370 million), mainly apples, cherries, and pears, placing Washington behind California and Florida as the Nation's leading fruit exporters. Washington was the second leading vegetable exporter at \$304 million, and fourth largest wheat exporter.

Four States were leading exporters of commodities but were not top 10 exporters. Arkansas remained the leading exporter of rice (\$358 million) and poultry and products (\$185 million). Wisconsin was the leading exporter of dairy products at \$191 million, North Carolina was the leading tobacco exporter with sales of \$602 million, and Georgia was the largest exporter of peanuts and products at \$111 million.

Methodology

The State export share estimates were based on the National Agricultural Statistical Service's

(NASS) crop production and livestock slaughter and production estimates. Each State received an export share based on its production share. The data for 1990-1992 were revised with the most current NASS production data. Supplemental data, such as the Census of Agriculture and the Department of Commerce's estimates for Exports from Manufacturing Establishments, were also used to estimate and adjust export shares.

(Joel Greene, Commodity and Trade Analysis Branch, 202-219-0822)

INDEX OF APPENDIX TABLES

Table	Exports	Page
A-1	U.S. agricultural exports: Quantity and value by commodity	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-February 1992/93 and 1993/94, and February 1994	A-5
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, October-February 1992/93 and 1993/94	A-70
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-February 1992/93 and 1993/94	A-71
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, October-February 1992/93 and 1993/94	A-72
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, October-February 1992/93 and 1993/94	A-73
Imports		
B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-February 1992/93 and 1993/94, and February 1993 and 1994	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-February 1992/93 and 1993/94, and February 1994	B-5
Prices		
C-1	Foreign currency units per U.S. dollar	C-1
C-2	Domestic and foreign wheat prices	C-2
C-3	Corn, sorghum, rice, and cotton prices	C-2
C-4	U.S. and northern European soybean and product prices	C-3
C-5	U.S. import prices	C-3

SUMMARY OF REPORT SB-871

Rankings of States and Commodities by Farm Cash Receipts

December 1993

Contact: Cheryl Steele, 202-219-0804

Cattle and calves, dairy products, corn, soybeans, and hogs were the leading U.S. agricultural commodities (in terms of cash receipts) in 1992. The top three commodities had the same ranking as in 1991, while soybeans and hogs traded places. The leading States for the top five commodities were:

- **Cattle and calves:** Texas, Nebraska, Kansas, Colorado, and Oklahoma.
- **Dairy products:** Wisconsin, California, New York, Pennsylvania, and Minnesota.
- **Corn:** Illinois, Iowa, Nebraska, Indiana, and Minnesota.
- **Soybeans:** Illinois, Iowa, Indiana, Minnesota, and Missouri.
- **Hogs:** Iowa, Illinois, Minnesota, Nebraska, and Indiana.

A new report by USDA's Economic Research Service, *Ranking of States and Commodities by Cash Receipts, 1992*, presents two types of ranking information: (1) the 25 leading commodities for each State and the Nation, ranked according to the estimated value of receipts; and (2) the ranking of States by receipts from each of the 25 leading U.S. commodities and by several major commodity groups.

U.S. net farm income rose 21 percent in 1992 to \$48.6 billion. Cash receipts from sales of crops were up \$2.9 billion and farmers added another \$2.8 billion worth of crops to inventories for future sale or onfarm use as feed or seed. Cash receipts from livestock and livestock products were down slightly.

California the Most Diverse Agricultural Producer, Vermont the Least

In 12 States, over 50 percent of receipts were from sales of a single commodity, indicating a high degree of dependence on the production and market conditions for

that commodity. In 10 States, a single livestock commodity accounted for more than half of the State's total agricultural receipts:

Cattle and calves: Wyoming (70 percent of total receipts), Colorado (63 percent), Kansas (58 percent), Nevada (55 percent), Oklahoma (53 percent), Nebraska (53 percent).

Dairy: Vermont (76 percent), Wisconsin (57 percent), New York (52 percent).

Broilers: Delaware (63 percent).

Alaska and Rhode Island had a single crop commodity (greenhouse/nursery) that accounted for more than 50 percent of total receipts.

Seven States had sufficient diversification in their agricultural production such that the leading commodity accounted for less than 20 percent of total receipts. The States and the two leading commodities (by percent of total receipts) are: California--dairy (14) and greenhouse (10); South Carolina--tobacco (16) and broilers (12); Oregon--cattle (16) and greenhouse (15); Virginia--cattle (16) and broilers (15); Florida--oranges (18) and greenhouse (17); Minnesota--dairy (18) and corn (17); and Ohio--soybeans (19) and corn (19).

Five leading commodity cash receipts, by State, 1992

Dairy products are among the top five commodities in all but 12 States.

Alabama:	Broilers, cattle and calves, greenhouse/nursery, peanuts, cotton
Alaska:	Greenhouse/nursery, dairy products, potatoes, hay, cattle and calves
Arizona:	Cattle and calves, cotton, dairy products, lettuce (western), hay
Arkansas:	Broilers, soybeans, rice, cotton, cattle and calves
California:	Dairy products, greenhouse/nursery, grapes, cattle and calves, cotton
Colorado:	Cattle and calves, corn, wheat, dairy products, hay
Connecticut:	Greenhouse/nursery, dairy products, chicken eggs, tobacco, cattle and calves
Delaware:	Broilers, soybeans, corn, greenhouse/nursery, dairy products
Florida:	Oranges, greenhouse/nursery, tomatoes (fresh), cane for sugar, dairy products
Georgia:	Broilers, peanuts, cattle and calves, chicken eggs, dairy products
Hawaii:	Cane for sugar, pineapples, greenhouse/nursery, macadamia nuts, dairy products
Idaho:	Cattle and calves, potatoes, dairy products, wheat, sugarbeets
Illinois:	Corn, soybeans, hogs, cattle and calves, dairy products
Indiana:	Corn, soybeans, hogs, cattle and calves, dairy products
Iowa:	Hogs, corn, cattle and calves, soybeans, dairy products
Kansas:	Cattle and calves, wheat, corn, sorghum grain, soybeans
Kentucky:	Tobacco, cattle and calves, horses/mules, dairy products, corn
Louisiana:	Cotton, cane for sugar, soybeans, rice, cattle and calves
Maine:	Potatoes, dairy products, chicken eggs, aquaculture, blueberries
Maryland:	Broilers, greenhouse/nursery, dairy products, soybeans, corn
Massachusetts:	Greenhouse/nursery, cranberries, dairy products, chicken eggs, apples
Michigan:	Dairy products, corn, greenhouse/nursery, cattle and calves, soybeans
Minnesota:	Dairy products, corn, soybeans, cattle and calves, hogs
Mississippi:	Cotton, broilers, soybeans, cattle and calves, aquaculture
Missouri:	Cattle and calves, soybeans, hogs, corn, dairy products
Montana:	Cattle and calves, wheat, barley, hay, sugarbeets
Nebraska:	Cattle and calves, corn, hogs, soybeans, sorghum grain
Nevada:	Cattle and calves, dairy products, hay, potatoes, greenhouse/nursery
New Hampshire:	Dairy products, greenhouse/nursery, apples, hay, chicken eggs
New Jersey:	Greenhouse/nursery, dairy products, chicken eggs, peaches, soybeans
New Mexico:	Cattle and calves, dairy products, hay, peppers (chili), pecans
New York:	Dairy products, greenhouse/nursery, cattle and calves, apples, potatoes
North Carolina:	Tobacco, broilers, hogs, turkeys, greenhouse/nursery
North Dakota:	Wheat, cattle and calves, barley, sunflower, sugarbeets
Ohio:	Soybeans, corn, dairy products, greenhouse/nursery, hogs
Oklahoma:	Cattle and calves, wheat, greenhouse/nursery, broilers, dairy products
Oregon:	Cattle and calves, greenhouse/nursery, dairy products, wheat, onions
Pennsylvania:	Dairy products, cattle and calves, greenhouse/nursery, mushrooms, chicken eggs
Rhode Island:	Greenhouse/nursery, dairy products, chicken eggs, potatoes, cattle and calves
South Carolina:	Tobacco, broilers, cattle and calves, ornamentals (other), soybeans
South Dakota:	Cattle and calves, wheat, hogs, corn, soybeans
Tennessee:	Cattle and calves, dairy products, cotton, tobacco, soybeans
Texas:	Cattle and calves, cotton, dairy products, greenhouse/nursery, sorghum grain
Utah:	Cattle and calves, dairy products, hay, turkeys, greenhouse/nursery
Vermont:	Dairy products, cattle and calves, greenhouse/nursery, hay, maple products
Virginia:	Cattle and calves, broilers, dairy products, tobacco, turkeys
Washington:	Apples, cattle and calves, dairy products, wheat, potatoes
West Virginia:	Cattle and calves, broilers, dairy products, turkeys, apples
Wisconsin:	Dairy products, cattle and calves, corn, hogs, greenhouse/nursery
Wyoming:	Cattle and calves, sugarbeets, hay, sheep and lambs, dry beans

SUMMARY OF REPORT SB-879

U.S. Agricultural Land is About 1-Percent Foreign Owned

May 1994

Contact: Peter DeBraal (202) 219-0425

Foreign interests owned 14.6 million acres, or slightly more than 1 percent of privately owned U.S. agricultural land as of Dec. 31, 1993, according to the U.S. Department of Agriculture's Economic Research Service. This percentage has stayed about the same since 1981. Acreage in foreign ownership in 1993 increased 1 percent (140,141 acres) from a year earlier.

About 53 percent of the reported foreign holdings involve land actually owned by U.S. corporations. The law requires them to register their landholdings as foreign if as little as 10 percent of their stock is held by foreign investors. The remaining 47 percent of the foreign-held land is owned by investors not affiliated with U.S. firms.

Because of the corporate holdings, an increase in foreign ownership from one year to another does not necessarily represent land newly acquired by foreigners. Nor do the numbers necessarily represent ownership exclusively by foreigners. A U.S. firm's landholdings can show up as "foreign owned" one year, but not another, as the firm's stock passes in and out of foreign hands. The land, however, is still owned by the same entity as before.

These and other findings are based on an analysis of reports submitted to USDA under the Agricultural Foreign Investment Disclosure Act of 1978.

The analysis also revealed:

--Forest land accounts for 48 percent of all foreign-owned acreage; cropland, 17 percent; pasture and other agricultural land, 32 percent; and nonagricultural land, 3 percent.

--Corporations (U.S. and foreign) own 71 percent of the foreign-held acreage; partnerships, 21 percent; and individuals, 6 percent. The remaining 2 percent is held by estates, trusts, associations, institutions, and others.

--Japanese investors own only 3 percent of the total foreign-held acreage, in contrast to 23 percent for Canadian investors, who lead. Investors (including individuals, corporations, partnerships, etc.) from Canada, the United Kingdom, Germany, France, Switzerland, the Netherlands Antilles, and the Netherlands own 72 percent of the foreign total.

--The largest foreign-owned acreage, mostly timberland, was reported in Maine. Foreign holdings account for 13 percent of Maine's privately owned agricultural land. These holdings represent 17 percent of all the reported foreign-owned land nationwide. Four companies own 88 percent of the foreign-held acres in Maine, all in forest land. Two are Canadian, the third is a U.S. corporation that is partially Canadian owned, and the fourth is a U.S. corporation that is partially French owned.

Trends in Foreign Ownership of Agricultural Land by Type of Use, 1981-93

SUMMARY OF REPORT AER-681

U.S. pear exports rose 478 percent from 1970 to 1991, and production rose 65 percent

April 1994

Contact: Amy L. Sparks, (202) 219-0085

Pears have become increasingly important in U.S. exports of fresh fruits. The United States was the third largest pear-producing nation in 1990, behind China and Italy. U.S. pear production increased 65 percent from 1970 to 1991, and U.S. exports of fresh pears increased 478 percent. The three primary export markets for U.S. pears are Canada, Sweden, and Mexico. These markets accounted for 77 percent of U.S. pear exports in 1990.

A new report recently released by USDA's Economic Research Service, *Pear Import Demand: Three Markets for U.S. Fresh Pears*, presents the results of an econometric analysis that examines competition in two major U.S. pear export markets, Canada and Sweden. While Mexico is an important and growing U.S. market, it involves little competition, since the United States is virtually Mexico's only supplier.

and the share for the rest of the world will decline. It appears likely that U.S. pear exports to Canada, Sweden, and Mexico will continue to grow, due to a trend toward increased production, improvements in shipping and storage technology, and the removal of barriers to entry, particularly in Sweden and Mexico. The trend toward increased U.S. pear production is expected to continue, because many former apple producers have shifted production to pears in hopes of higher returns. This substitution has been a result of prior heavy production of apples, along with an increase in imports, relatively stable per capita demand, and a resultant drop in prices.

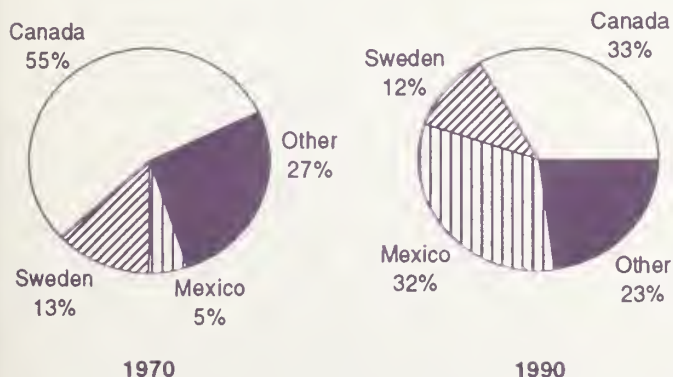

Southern Hemisphere pears enter the market when Northern Hemisphere pears are essentially all consumed. At that point, the prevailing price for pears in Northern Hemisphere markets is high. This draws pears from further distances, such as the Southern Hemisphere.

U.S. Exports Are Expected To Grow

Study results indicate that as total expenditures on pears increase in Canada, the U.S. share of imports in the Canadian market will increase slightly, while those of the Southern Hemisphere and the rest of the world will fall. The U.S. share of exports to Sweden will increase slightly, while the European share will double

U.S. fresh pear exports, 1990/91

The three primary markets for U.S. fresh pears are Canada, Mexico, and Sweden.
